

AGENDA OF POSTERS: 25, 26 and 27 September 2007

Poster sessions will be held during coffee (10:30-11:00 & 15:30-16:00) and lunch time (12:30-14:00).

Posters section

Speaker	Title
Awad Hassan	Assessment of oily wastes inputs into marine environment from costal petroleum refineries : case studies
Besiktepe Sükrü	Effects of the physical and biogeochemical variabilities on the spatial heterogeneity of the zooplankton distribution in the Black Sea
Book Jeffrey	Observations of the Western Adriatic Current as a summertime mixed-layer system
Bozzano Roberto	Off-shore Wave Measurements in the Ligurian Sea
Carniel Sandro	Double-Diffusive Layers in the Adriatic Sea
Carniel Sandro	What do we need to accurately model the upper layer ocean velocity: the example of a Bora event in the Adriatic Sea
Carriere Olivier	Sound-speed field tracking in a range-dependent shallow water environment by ensemble Kalman filtering
Casagrande Gaelle	Internal waves in the Strait of Messina
Cedric Gervaise	A passive acoustic contribution to REA: geoacoustic inversion using ship noise
Cipollini Paolo	ALTICORE - a consortium serving European Seas with Coastal Altimetry
Cisneros Jesus	Diapycnal fluxes in shelf waters with estuarine influence due to internal inertial waves
Cisneros Jesus	The Magistrato Alle Acque real-time monitoring network
Cosoli Simone	Coastal radars for surface current monitoring: Venice and Istrian coast examples
Fabiani Alessio	Client-server interoperable geospatial information system to support Operational Oceanography applications
Grasso Raffaele	Empirical algorithms for bathymetry estimation in littoral areas by fusing multi-spectral satellite data and depth samples collected by AUVs
Griffa Annalisa	Statistical prediction of particle motion and planning of Lagrangian sampling for the DART experiment using historical drifter data
Hermant Jean-Pierre	Geoacoustic inversion in the north-eastern Caribbean using a hydrographic survey vessel as a sound source of opportunity
Korotenko Konstantin	Operational Model for Prediction Circulation and Transport of Oil Spills in the Black Sea
Kourafalou Villy	Monitoring and prediction in the dynamically and topographically complex South Florida Coastal Seas System
Langa Avelino Angelo Adolfo	West water dispersion from Infulene Vale in Maputo Bay
Lenartz Fabian	Swell forecast with a super-ensemble
Martin Paul	Comparison of NCOM and ADCP currents during DART
Martucci Gianni	Method comparison for extreme wave analysis on the Italian coasts
Meyrat Jean	Daurade: an AUV for REA
Mondal Md. Abdul Matin	Sea level rise monitoring along the coast of Bangladesh
Morovic Mira	Optical properties in the Gargano-Manfredonia Gulf region
Nagy Hazem	Interannual variability of the Egyptian shelf zone circulation
Osler John	Extracting bottom information from towed-array reverberation data
Pennucci Giuliana	Optical properties and water clarity, a comparison between in-situ measurements and satellite derived products in the Adriatic sea.
Pennucci Giuliana	Bathymetry estimation from high-resolution satellite images
Pidcock Rosalind	Real time assessment of a developing eddy dipole in the Iceland Basin
Rixen Michel	Improved near-shore ocean predictions from trawl-safe bottom mounted platforms and super-ensembles techniques
Schiano Elisabetta	Vertical structure of the marine boundary layer during the LASIE experiment.
Spagnoli Federico	Marine coastal monitoring in the Gulf of Manfredonia (Southern Adriatic Sea)
Taillandier Vincent	A mesoscale eddy tracked along the Libyo-Egyptian coast (Eastern Mediterranean Sea): reconstruction and characterization from surface drifters and altimetry
Vousdoukas Michalis	Measuring waves in the surf/swash zone using video/image processing methods
Zhuk Elena	Operational data management in MHI NASU
